

◆ HOROSCOPE ◆

**Planet of the Day:** Mercury (Wednesday)

**Transit Summary**

- Mercury square Uranus: mind-sparks, tech glitches, and abrupt pivots; keep comms simple and documented.
- Moon square Mars: short fuse potential—move the body before big conversations.
- Moon opposite Jupiter: watch for overcommitting or overexplaining; favor measured, practical steps.
- Capricorn Moon + Virgo Sun vibe: organize, prune, ship small useful things.

**Upcoming Events**

**Morning:** Brief planning + intention-setting; align tasks to one pragmatic outcome.

**AM window:** Focused build block: quiet solo work; defer hot-button threads.

**All day:** Mercury-ruled day—keep notes, version your changes, sanity-check assumptions.

**Background:** Energy spikes/dips are normal today; pace yourself and keep hydration/snacks handy.

**Focus of the Day**

**Do's:**

- Batch messages; keep them concise and kind.
- Ship a small, done definition (PDF layout or helper script).
- Ground with 5–10 min movement before hard tasks.

**Don'ts:**

- Don't debate while hungry or rushed.
- Don't overpromise under Moon-Jupiter.
- Don't refactor everything—touch only what today needs.

**Opportunities:**

- Unexpected insight for JSON→PDF helpers.
- Declutter one frictiony process (naming, folders, or templates).

**Warnings:**

- Watch for edgy tone in DMs.
- Tech gremlins; commit often and keep backups.

**Practical Task List**

- ☐ Finalize Page 3 two-frame spacing and divider draw.
- ☐ Add graceful-skip logic for empty sections (esp. transit\_summary).
- ☐ Draft old→new schema migration script skeleton.
- ☐ Create a tiny sample dataset for e2e test.
- ☐ Jot 'gotchas' from today into README.

**Creative Flow of the Day**

**Project:** Daily Planner 4-page generator

**Mode:** Edit / polish

**Time Box:** 50–60 min

**Bonus:** Optional evening free-write: 10 lines about how Mercury energy actually showed up today.
